Performance Analysis

& Analysis driven budget allocation

Praveen Kumar Kanta

03/09/2026

Introduction

Source: AstroSage Website

- **Mobile Pioneer:** Long before modern app stores existed, AstroSage launched ***"Mobile Kundli"*** in 2001 for Palm handheld devices, making it one of India's earliest consumer mobile applications.
- **Cloud Innovator:** The platform introduced AstroSage Cloud in 2004, marking the country's first consumer cloud-based service for personal data and astrological charts.
- **Early AI Adoption:** AstroSage launched Bhrigoo.ai in 2018, establishing one of the world's earliest AI-powered Vedic astrologers years before generative AI became a mainstream global trend.

Problem Statement

- **Optimizing** the Call Center operations for AstroSage:
  - which has received a 1 Cr investment.
- The goal is to determine how to allocate this investment **to maximize**:
  - operational efficiency
  - customer satisfaction
  - profitability.
- This project will involve **analysing**:
  - historical call data
  - performance metrics
  - market trends

  to make informed decisions.

Data Summary

- ~ONE MONTH Data with:
  - 28027 records with 35 attributes
  - Mainly From 2 channels: Call and Chat
  - Stats from both user and agent end combined
  - 15+ categorical attributes, mostly around Call and Chat metrics and statuses.

_id	user	chatStatus	guru	guruName	gid	uid	consultationType	website	refundStatus	isWhiteListUse	chatSeconds	queue

Cleaning Data

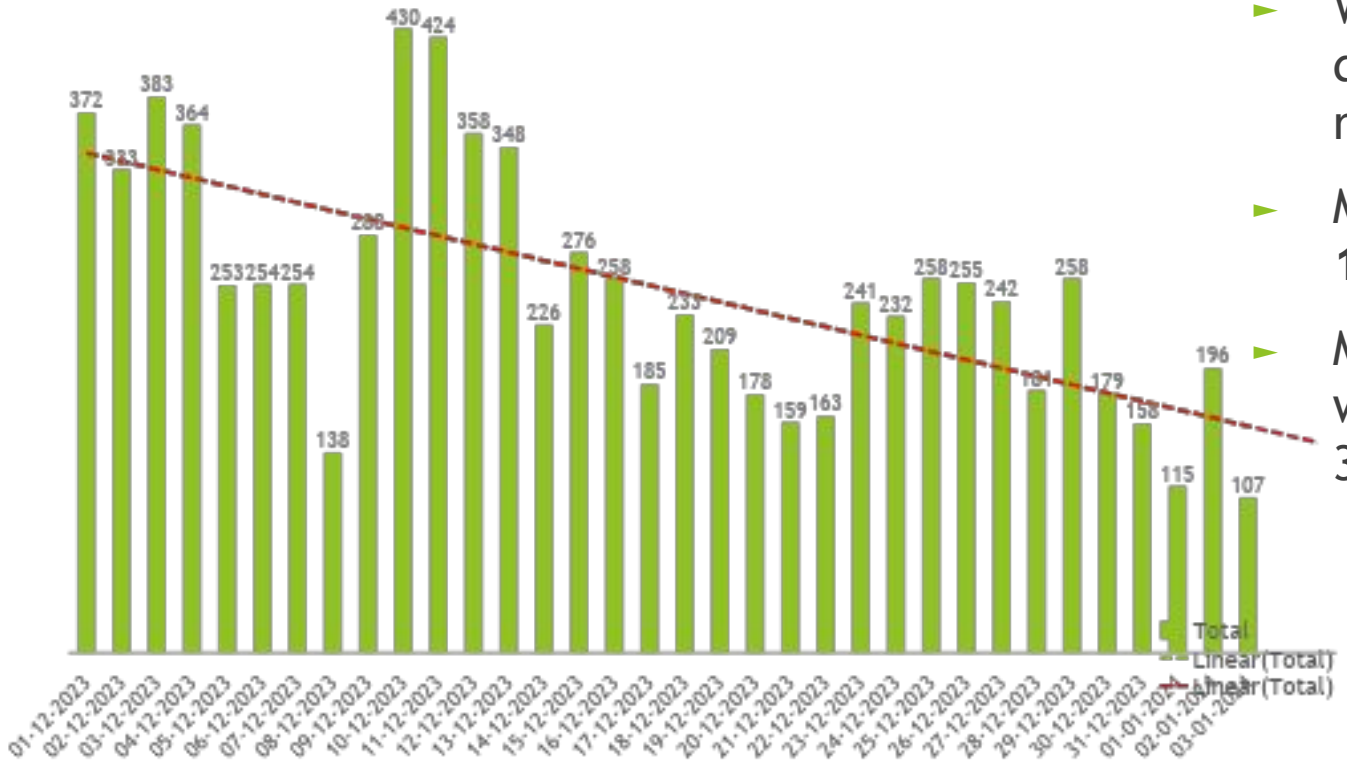

Action	Why?	How?
All Headers now have _, spaces stripped off and Uppercase first letter	Improves readability & Essential for Creating Pivot Charts	=PROPER(), =TRIM()
Unified /Standardized Status to show both Calls and Chats as same attribute	Overall performance measurement needs unified data, especially charts.	=CONCATENATE, &, Lookup functions
Reordered the Columns and created new columns	Understand what's happening in short time	=IF() | =IF(IF(),) | String Ops | lookup functions
Separated Date from Time	Better readability	Text To Columns
Removed few Columns such as hash / identifiers	We have in master data anyway	Select | Delete

ConsultationIdentifier	UserID	Unique / Repeating	ConsultationType	ConsultationStatus	GuruName	GuruID	Website	RefundStatus	chatSeconds	freeCall	FreeCall	freeChat
656922f2919324acb6e87139	30129	Repeating	Chat	Chat : Incomplete	Astro Sanjeev	95	gurucool	no-refund	300	FALSE	Not Applicable	TRUE
65692413919324acb6e87441	30129	Repeating	Chat	Chat : Incomplete	Astro Sanjeev	95	gurucool	no-refund	300	FALSE	Not Applicable	TRUE
65692612919324acb6e87738	28743	Unique	Chat	Chat : Incomplete	Astro Sanjeev	95	gurucool	no-refund	300	FALSE	Not Applicable	TRUE

Daily Call Volume

The call volume shows an OVERALL DOWNTREND with a peak in Mid-December 2023 and slowly declined towards early January 2024

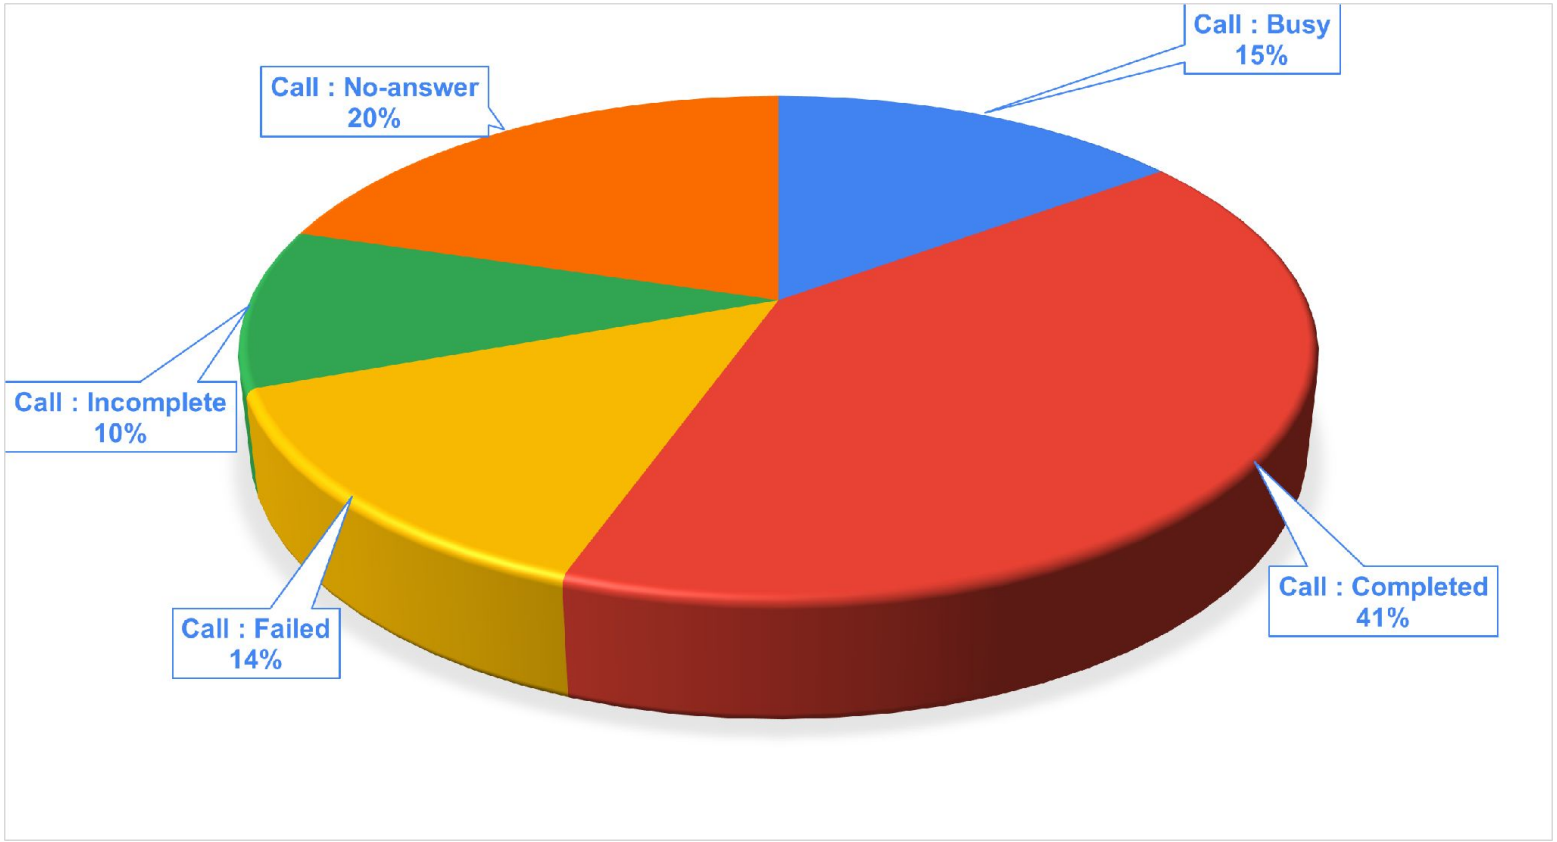

- We have an average daily volume of ~**250** records / day
- Max recorded **430** on **10th Dec**
- Minimum on **3rd Jan** with **107** records. (Only 3 days in **Jan** anyway)

Call Volume Distribution

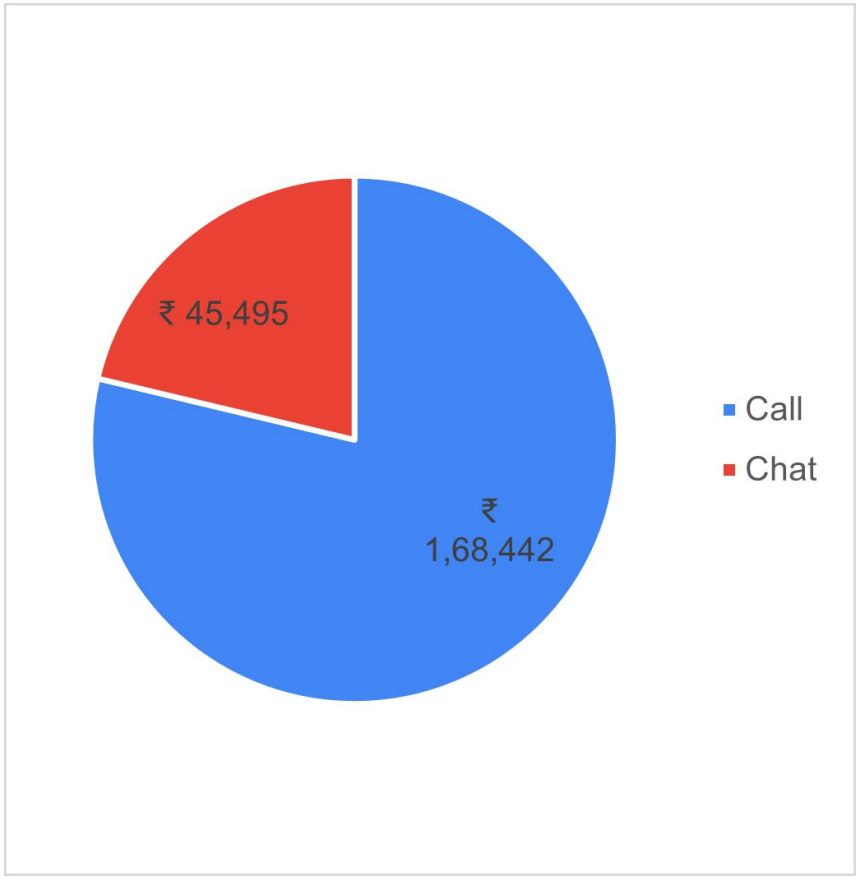

- 92% of the calls are through the App

Call Status

- **Only 41% of the calls are complete.**
- **35% is responsible to lack of Operators.**
  Busy
  No-Answer
- **24% seems a Technology issue.**
  Incomplete
  Failed

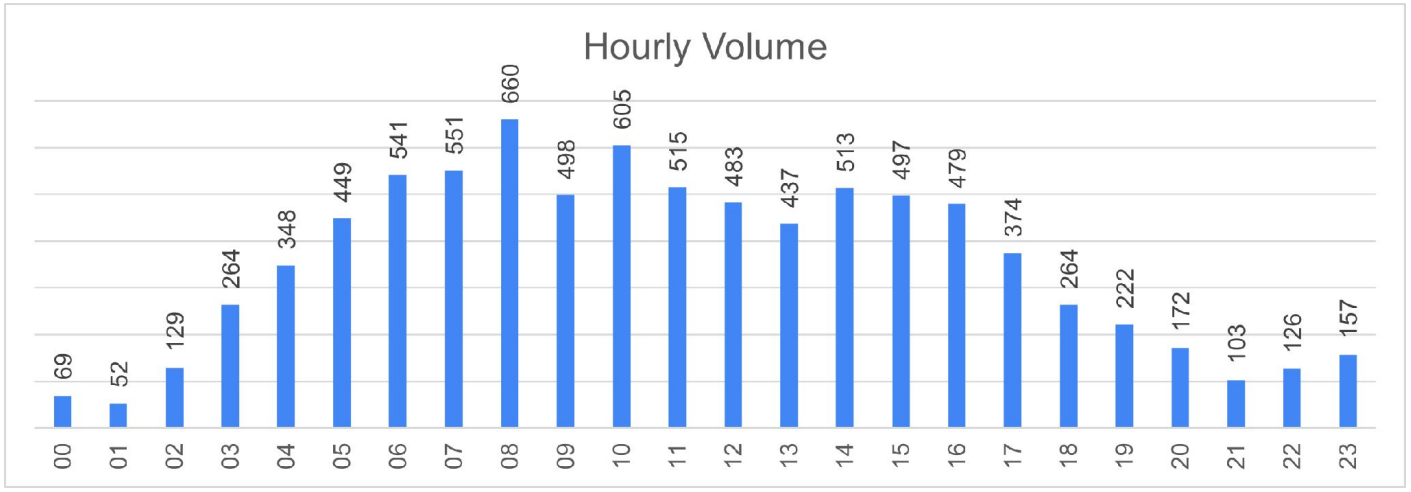

Revenue

Through	Revenue
Call	₹ 1,68,442
Chat	₹ 45,495
Total	**₹ 2,13,937**

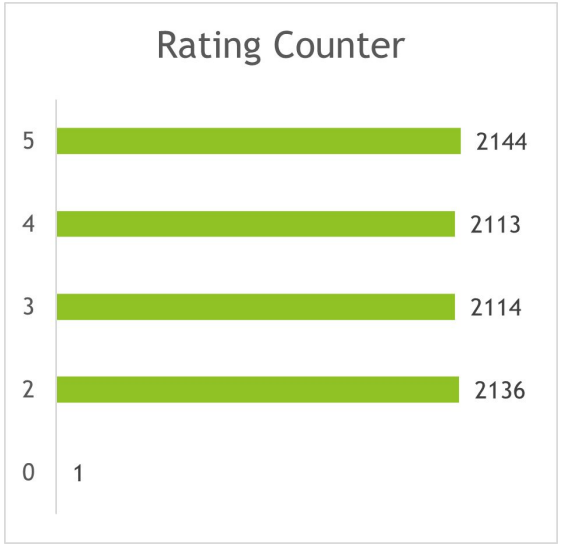

- **₹ 1,68,442** is from Call making it biggest source of revenue accounting to **~80%** of the Revenue

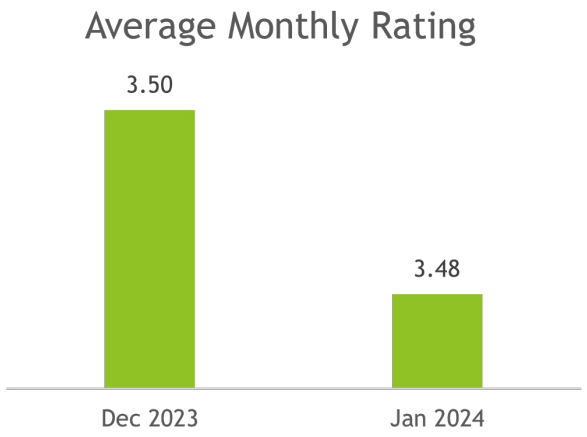

Peak Hours

- **06:00 - 10:00** are the **Peak Hours**
- **20:00 - 03:00** are the **Silent Hours**

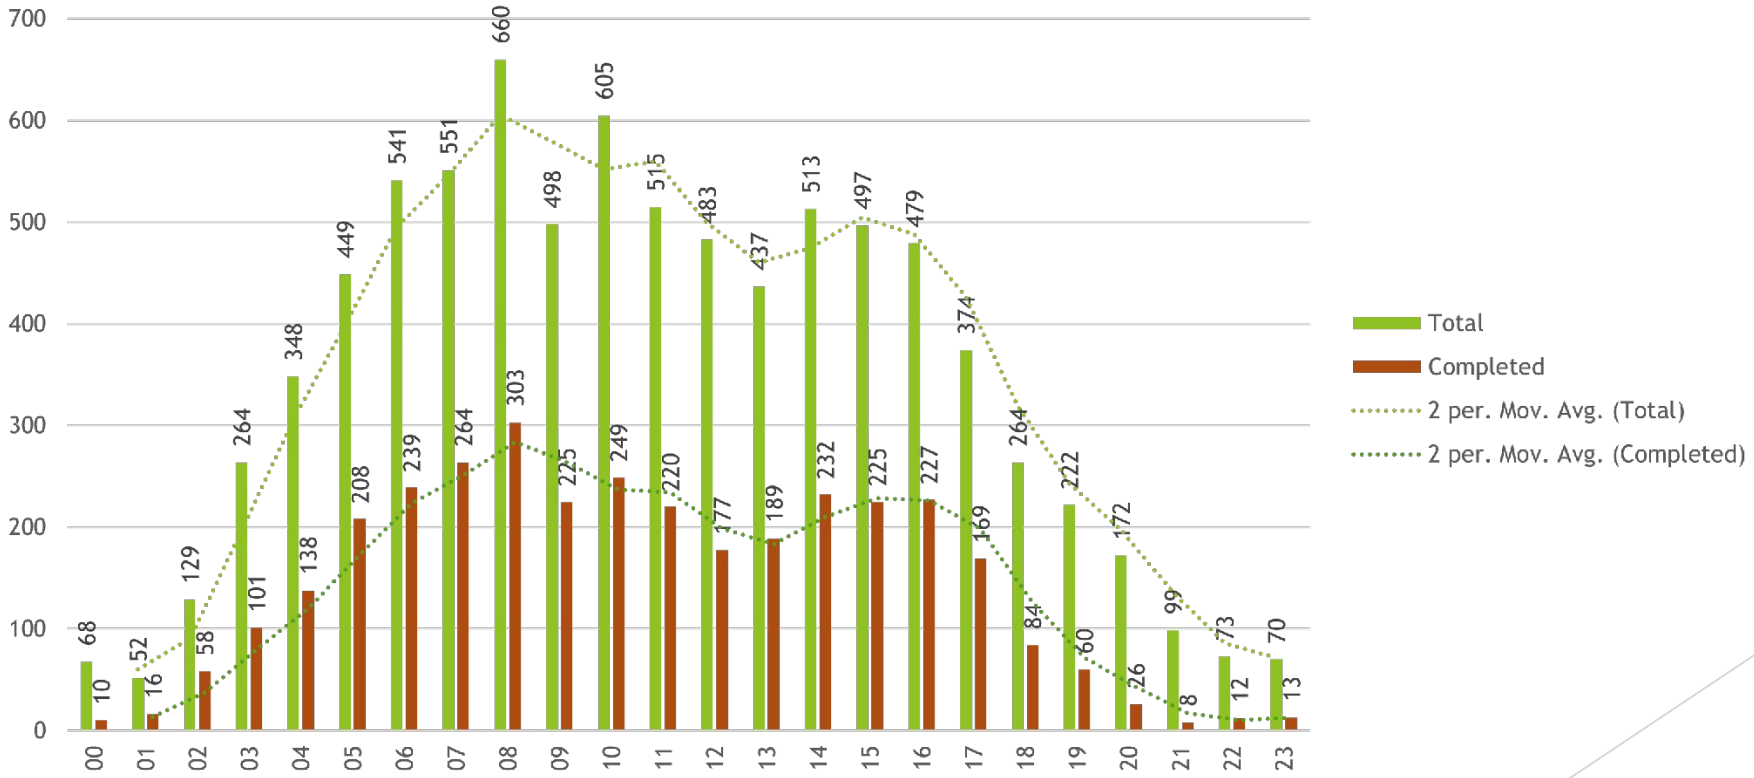

Call Rating

- No call ever received **6 and above.**
  Training needed!
- The Overall Rating remains **< 4** for both months.

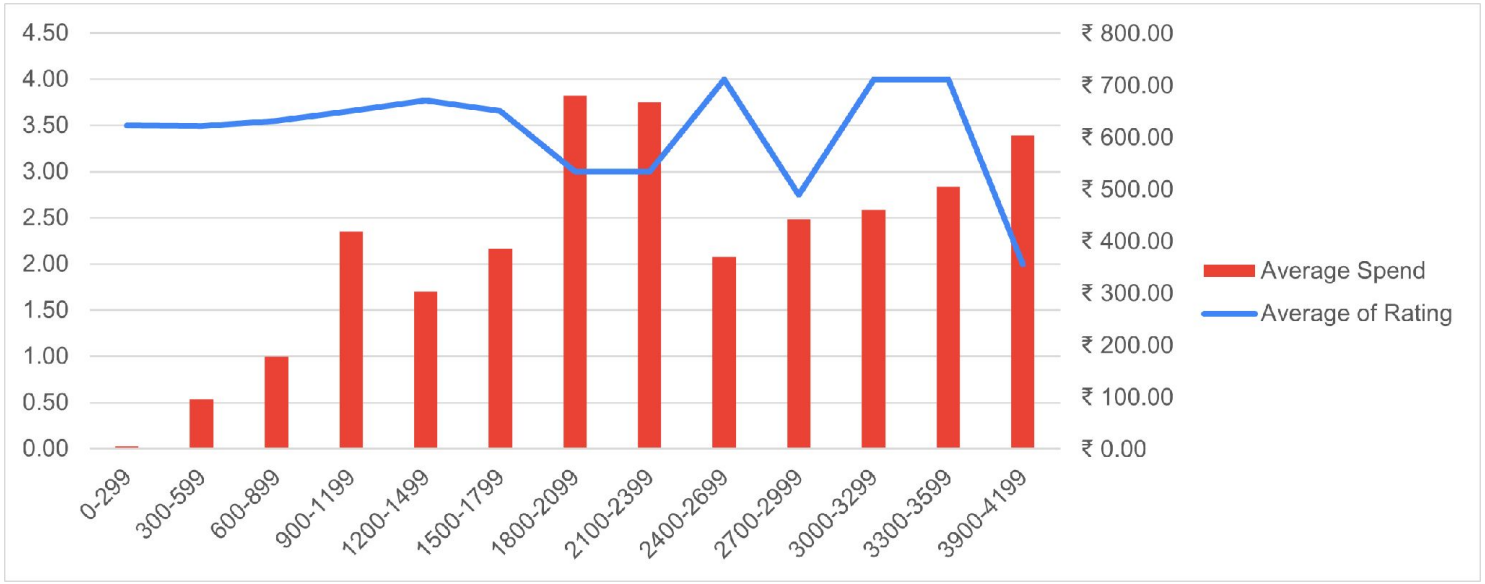

Hourly Volume vs Completed

- At Peak Hours, the **COMPLETION RATE** is significantly **LOW.**

Duration vs SPEND vs RATING

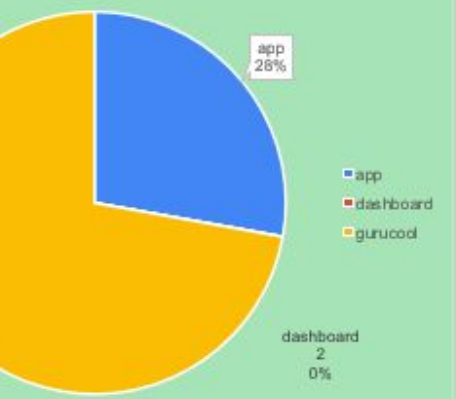

- 30 MIN – 40 MIN Range is Abnormally Opposite.
- SPEND is inversely proportional to SPEND
- At Higher Durations, RATING collapse due to High Spend.

AstroSage Call Center Operations

Total Volume	Average Volume	Operational Cost	Revenue	Average Rating
28027	629.35	₹ 99,146.57	₹ 2,13,987.32	2.93

Recommendations

- Platform Fix: Only ~40% Call Completion, Better Call Routing System is Needed.
- Discounted Tariff for Long Callers.
- Divide shifts into 4H slots, especially
  06:00 – 10:00
  10:00 – 14:00
  14:00 – 18:00
- Distribute Call volume among all Agents: Avoid Burnout.

Conclusions

- The Call center performance of AstroSage data has been cleaned and thoroughly analysed.
- Insights through various KPIs have been deduced and a real-time dashboard has been generated.
- Improvement plans have been structured and recommended.
